                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Transforming growth factor beta-1 precursor [validated] - human

N.Alternate names: growth-inhibitory factor; TGF type 2; TGF-beta

C.Species: Homo sapiens (man)

C.Species: A.S. Fibe. 1986

C; Comment: The source of this protein is ovarian follicular fluid.
C; Comment: The mature protein is the carboxyl-terminal segment of a precursor polypeptic if comment: Inhibin have been isolated (A and B) that differ in the amino-terminal c; Comment: Inhibin is secreted by ovaries or testes and inhibits the secretion of follit c; Superfamily: inhibin
C; Keywords: contraceptive, follitropin inhibitor; glycoprotein; gonad
C; Keywords: contraceptive, follitropin inhibitor; glycoprotein; gonad

Inhibin beta-A chain precursor - rat
C;Species: Rattus norvegicus (Norway rat)
C;Species: Rattus norvegicus (Norway rat)
C;Date: 10-Sep-1999 #sequence_revision 10-Sep-1999 #text_change 10-Sep-1999
C;Accession: B40905; B40056
R;Esch, F.S.; Shimasaki, S.; Cooksey, K.; Mercado, M.; Mason, A.J.; Ying, S.Y.; Ueno, Mol. Endocrinol. 1, 388-396, 1987
A;Title: Complementary deoxyribonucleic acid (cDNA) cloning and DNA sequence analysis A;Reference number: A40905; MUID: 90331931
A;Accession: B40905
A;Status: preliminary; not compared with conceptual translation
A;Molecule type: mRNA
A;Reference mumber: H.; Jones, P.B.C.; Hsueh, A.J.W.; Mayo, K.E.
Mol. Endocrinol. 1, 561-568, 1987
A;Title: Rat inhibin: molecular cloning of alpha- and beta-subunit complementary deox
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Dome morphogenetic protein-7 - chicken (fragment)

A; Title: Bone morphogenetic proteins and a signalling pathway that controls patterning A; Reference number: 150607; MUD:94163974

A; Accession: 150608

A; Astatus: preliminary; translated from GB/EMBL/DDBJ

A; Molecule type: mRNA

A; Residues: 1-405 < FRA>

A; Cross-references: EMBL:X75915; NID:9472929; PIDN:CAA53514.1; PID:9472930

Done morphogenetic protein-3b precursor [similarity] - human
N.Alternate names: BMP-3b; GDF-10
S.Alternate names: BMP-3b; GDF-10
S.Species: Homo sapiens (man)
C.Species: Takeshita, N.; Konno, Y.; Nishizawa, T.; Matsuo, H.; Kangawa,
Biochem. Biophys. Res. Commun. 223, 304-310, 1996
A.Title: CDNA clouing and genomic structure of human bone morphogenetic protein-3b (B
A.Reference number: JC4838; MJID:96264636
A.Contents: femur
A.Accession: JC4838
A.Molecule type: mRNA
A.Residues: 1-478 <HIN>
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      A;Cross-references: DDBJ:D49492; NID:g699603; PIDN:BAA08452.1; PID:g699604
C;Comment: This protein induces endochondral bone formation, chemotaxis of monocytes,

A;Title: Identification of rat bone morphogenetic protein-3b (BMP-3b), a new member of E
A;Reference number: JC4646; MuID:96193707
A;Accession: JC4646
A;Molecule type: mRNA
A;Residues: 1-476 <ARK>
A;Cross.references: DDBJ:D49494; NID:9699625; PIDN:BAA08454.1; PID:9699626
A;Experimental source: femur
C;Comment: This protein plays a role in the central nervous system as well as in new bor acellular matrix.
C;Superfamily: inhibin
C;Keywords: bone: glycoprotein
